

Yuna Espejo Santana

Junior Integration Consultant | Computer Engineering Student

Barcelona, Spain | y.espejo.santana@gmail.com | yunaespejo.com | linkedin.com/in/yuna-espejo-santana

SUMMARY

Junior Consultant building enterprise data integrations with SAP Integration Suite for multinational clients in telecoms, insurance, pharma and workforce management. Background in Linux systems administration and now studying Computer Engineering (Software Engineering track) at UOC. Focused on reliable backend integrations, process automation and CI/CD. Went from no prior SAP experience to owning integrations end to end within months.

EXPERIENCE

Junior Consultant, Digital Integrations — Timestamp Spain (Timestamp Group)

November 2025 – Present | Part-time | Barcelona / Remote

- Redesigned a daily employee-data integration from SuccessFactors to a client HR system into full, incremental (delta) and snapshot load modes, so only changed records are sent; significantly reduced daily API calls. In production and documented (v1.6). (International pharmaceutical client)
- Investigated course synchronisation failures between an LMS and SuccessFactors; identified and fixed three root causes (incremental window, completion filter, schema mismatch) and uncovered a data-quality issue affecting 2,650 of 2,667 catalogue titles. (Telecoms client)
- Mapped entity dependencies and defined the execution order for a 7-flow ERP-to-CRM integration within strict API limits (30-character external IDs, 200-record batches), resulting in a clear ~60-day plan. (Optical-sector client)
- Migrated a complete integration environment from SAP Neo to Cloud Foundry: credentials, environment setup, import, functional verification and SFTP reconfiguration.
- Built employee lifecycle integrations (hire, termination, data change, leave) and automated daily standard and encrypted CSV exports scheduled with crontab and versioned in Bitbucket.
- Own the full integration lifecycle: requirements, development in Groovy and JavaScript, testing, technical documentation and production deployment.

SAP Integration Trainee — Timestamp Spain

March 2025 – October 2025 | Internship | Barcelona

- Developed two GitHub Actions workflows: automated best-practice checks for integrations and an automated migration pipeline between environments.
- Built an employee onboarding/offboarding integration with cross-platform data synchronisation.
- Validated integrations with Postman collections and supported project tracking in NetSuite and Jira.

IT Technician Intern — ClickTech (Erasmus+)

March 2024 – April 2024 | Amarante, Portugal

- Assembled and configured computers, servers and network devices; resolved incidents and ran connectivity tests.

Marketing and Social Media Intern — Grupo Actialia

October 2023 – January 2024 | Palafròls, Spain

EDUCATION

Bachelor's Degree in Computer Engineering, Software Engineering track — Universitat Oberta de Catalunya (UOC)

September 2026 – Present

Higher Technician in Network Computer Systems Administration (ASIR) — IES Sa Palomera

2024 – 2026 | GPA 8.68/10 | Linux and Windows Server, Docker, scripting, networking, databases, security

Technician in Microcomputer Systems and Networks (SMR) — IES Sa Palomera

2021 – 2024 | GPA 7.5/10

SKILLS

Integration: SAP Integration Suite (Cloud Integration), SAP BTP, SuccessFactors, SAP Plateau LMS

Programming: Groovy, SQL, Python, JavaScript

APIs and data formats: REST APIs, XML, XSLT, JSON, CSV, SFTP, Microsoft Graph

DevOps and tools: CI/CD, GitHub Actions, Git, Bitbucket, Docker, Linux, crontab, Postman

Databases and BI: PostgreSQL, MySQL, Power BI, Advanced Excel

CERTIFICATIONS AND ACHIEVEMENTS

- 3rd Place, National Excel Championship — PUE Academy (June 2025)
- Discovering SAP Business Technology Platform, Record of Achievement — SAP (March 2025)
- Microsoft Office Specialist: Excel Associate (Microsoft 365 Apps) and Word Expert (Office 2019) — Microsoft
