PROFESSIONAL PROFILE

Systems Administration Technician (ASIR) with hands-on experience in international technology consulting at Timestamp Spain — a Portuguese multinational with 1,000+ professionals and offices in Portugal, Spain, Colombia and the Netherlands. Specialised in enterprise system integration (SAP Integration Suite / SCI), CI/CD process automation and Linux administration. I have managed end-to-end integration projects for high-profile clients including Telefonica (EdCast), Mapfre, Quinyx and Insudpharma — covering design, development, technical documentation and production deployment. Results-driven, self-sufficient and committed to continuous improvement.

WORK EXPERIENCE

Junior Consultant | Timestamp Spain (Timestamp Group — international technology consultancy)

November 2025 – Present · Part-time contract · Barcelona / Remote

- Development and maintenance of enterprise integrations in SAP Cloud Integration (SCI) for multinational clients.
- Full integration lifecycle management: design, development in Groovy/Node.js/JavaScript, testing, documentation and production deployment.
- Technical documentation in multiple formats: integration datasheets (Excel), technical manuals (Word) and client-facing presentations (PowerPoint).
- CI/CD pipeline automation with GitHub Actions; repository management in Bitbucket.
- International project collaboration across telecoms, insurance, pharma and workforce management sectors.

Key Projects:

EdCast (Telefonica)

LMS Integration & Data Automation

- Generated extraction files from LMS (SAP Plateau): courses, training actions and training groups, deployed to the production platform.
- Built API_MAESTROS integration: field mapping and generation of standard and encrypted CSV files with employee data per client specifications.
- Configured crontab for automatic daily execution at 23:00; published code to Bitbucket for shared team access.
- Full NEO to Foundry migration (EdCast): credential review and download, environment setup, integration import, functional verification and SFTP reconfiguration.

Mapfre Peru

HR Integrations (Hire / Terminate / Change / Leave)

- Developed complete employee lifecycle integrations: hire, termination, data change and leave management.

Quinyx (Germany)

User Relaunch & XML Generation

- User relaunch by ID based on registered incident, redirecting to the corresponding integration flow.
- Generated sample XML output and sent by email for client validation.

Insudpharma

Employee Recognition Automation

- Modified the tenure recognition project: automated email notifications to employees and senior management at 5, 10, 15, 20+ year milestones.

SAP Integration Trainee | Systems Automation & Data Flows | Timestamp Spain

March 2025 – October 2025 · Internship · Barcelona

- Developed two critical GitHub Actions workflows: automated best practice checks and environment migration pipeline.
- Built employee lifecycle integration (onboarding/offboarding) with cross-platform data synchronisation.

- Project support in NetSuite and Jira: time tracking and budget control.
- Technical documentation and integration validation using Postman collections.
- Compliance support (NetSuite, SCI).

IT Technician Intern | ClickTech (Erasmus+ Programme)

March 2024 – April 2024 · Amarante, Portugal

- Assembly and configuration of computers, servers and network devices. Incident resolution and connectivity testing.

Marketing & Social Media Intern | Grupo Actialia

October 2023 – January 2024 · Palafolls, Spain

- Social media creation and management; onboarding of new team members.
